

Dear Colleagues

Tribal population in India represents diverse geo-socio-cultural area, linguistic and subsistence pattern as well as but also exhibits different level of development. If we place them on the development scale in with respect to education, socio-economic status and health we can easily visualize the disparity among them. Although since independence government has tried for their overall development through various programmes but no significant achievement has been noticed. Rather there are some groups whose condition is becoming more precarious. It has been observed that most of the existing programmes are not in accordance with their socio-cultural background. Therefore this seminar is being organize to deliberate on various important issues related to tribal development through plenary session, invited lecture and open discussions with researchers and administrators for the effective recommendation for the policy makers.

Aims of the seminar are :-

- (1) To find out various tribal problems and associated factors.
- (2) To discuss relevance of present programmes / policies.
- (3) To make recommendations for need based area and groups specific strategies.
